

Specialist Equipment

Our product range has been developed in response to customer requirements and so we understand and can help with specific technical issues. As well as manufacturing and supplying chemicals and consumables, we also manufacture and supply equipment such as sprayers and water filtration units.

Our range of **professional quality sprayers** includes compression and knapsack systems with capacities from 1 to 20 litres, robust enough to handle acidic and alkaline solutions so suitable for any job and environment. Spares and ancillaries include telescopic lances and multiple nozzle booms.

Our **filtration systems** can be designed to suit your installation varying from basic models to multi-stage filtration. Applications include sludge removal from degreasing tanks and wet spray booths to enable the recycling of water for "zero reject".

Technical information for our machines can be found at

- **Input and Extraction Air Filters**
- Concertina Spray Booth Paper Filters
- Glass Fibre and Media Rolls
- Pleated and Fibre Panels
- **Spray Booth and Workshop Protection**
- Peelable and Tacky Coatings
- Wet Sludge Treatment and Recycling
- Paint Strippers and Robotic Line Flush
- Floor and Surface Cleaners
- **Metal Preparation Solutions**
- Degreasers, Phosphates and Solvents
- Aluminium and Alloy Etches
- Detergents and Descalers
- Anti-Spatter and Welding Supplies
- **Surface Biocides and Detergents**
- Mosskillers and Weedkillers
- Timber Cleaners and Wood Preservatives
- Oven and Kitchen Cleaners
- **Bodyshop Supplies**
- Spray Booth Filters
- Vehicle Cleaners
- Forecourt Oil Strippers
- **Waste Water Treatment Plant**
- Water Filtration Units
- Sprayers and Safety Clothing

Spray Booth Filters

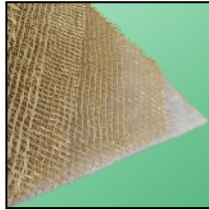

Procart Filter Range

Procart concertina filters give superior filtration and provide a constant airflow in all types of spray booth for all coatings including liquid and powder paints as well as glues and dust. Our unique range of extraction filter designs include the option of secondary filtration to ensure that you will have the best filter for your application.

NEW - Procart K

Procart K is the ideal replacement for the green/white Paintstop glass fibre filter. This new paper mesh filter offers high density filtration, lasts 2-3 times longer than Paintstop and is safer to handle. Supplied boxed, these filters are also easy to store.

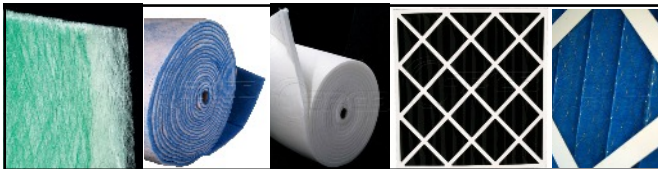

Profibre Filter Range

We supply the full range of Paintstop and media rolls and cut pads for both solvent and water-based sprays. Input and extraction filters come in various depths and sizes as well as being able to be cut to fit your particular requirements.

Pleated and Glass Fibre Panels

Input and extraction panels for balanced booths and ovens.

Water Treatment & Protective Coatings

Proco Water Treatment Range

Paint waste in wet spray booths and waste water from flushing and cleaning processes or degreasing plants can be easily treated either within the system or separately even when different types of coatings, lubricants, glues, oils and greases are being used together.

A cleaner booth has many advantages including:

- Reducing downtime and man hours spent on maintenance
- Eliminating blocked nozzles and pipes
- Increasing the working life of valuable equipment
- Improving the efficiency of your booth or spray tank
- Creating a safer working environment for personnel
- Enabling the recycling of water for "zero reject"
- Reducing waste disposal costs

Protec Coatings Range

Protective coatings are essential for keeping your working area clean, safeguarding equipment and ensuring a quality finish without the drift of overspray onto parts.

Peelable coatings are easily removed from floors and walls even when full of paint. Tacky coatings attract powder and dust from the environment.

Degreasing & Surface Treatment

The quality of your preparation and cleaning process is paramount to ensure perfect adhesion of coatings to surfaces. Our comprehensive range of surface treatments for use on all materials can be adapted to suit your requirements and type of installation. Solutions include phosphates, solvents, derusting agents, anti-spatter as well as all-in-one degreasing and etching for aluminium which can be applied by brush, dip or spray. We have also designed a unique enclosed system for spraying large pieces of equipment and machinery in-situ followed by the filtering and re-use of treatment water.

Biocides, Detergents and Cleaners

We have solutions for a wide range of cleaning problems both in and out of the factory including:

- A bodyshop range including washes and waxes for vehicles, oil strippers for forecourts, interior cleaners and spray booth filters.
- Paint strippers and cleaners for spray booth lines, jigs and parts.
- Cleaners for factory and workshop floors and walls including the removal of tyre marks.
- Detergents for kitchens, food preparation surfaces, stoves and ovens.
- Biocides for clearing moss, algae, mould, weeds and environmental damage on interior and exterior surfaces. More details at [www.moskillers.co.uk](http://www.mosskillers.co.uk)
