

PLEATED PANEL G4 FILTERS

SYNTHETIC MEDIA WITH CARDBOARD FRAME - 1 inch 20 mm deep

The Pleated Panel is an economical disposable filter with a high level of filtration, or pre-filtration in HEVAC applications. The patented synthetic filter media is an upgrade from traditional cotton polyester and is bonded into a water repellent Aquakote® card frame.

TECHNICAL ADVANTAGES

- graduated density for even dirt loading and greater dust holding capacity.
- hydrophobic, it will not load with air moisture.
- constant efficiency due to extra electrostatic charge.
- low pressure drop.
- continuous non-shredding fibres.
- heavy Aquakote board at 710 microns.
- wet tear strength 6963mH.
- specially formulated adhesive to maintain adhesion even when wet.
- expanded steel backing for maximum support with minimal airflow resistance.
- operating temperature continuous 80°C.
- many custom sizes can be made to order.

PERFORMANCE				
Filter Class ISO 16890	ISO Coarse 85%			
Filter Class EN779:2012	G4			
Filter Depth	20mm			
Rated Airflow	1.5m/second			
Initial Pressure Drop	49Pa			
Final Recommended Pressure Drop	150Pa			

We cannot be held liable for any application or use that does not comply with our instructions
