

# CLEANER 3132PP

Completely enclosed pumphead to protect mechanism from dirt & dust

Built-in pressure relief valve

Fully adjustable nozzle

Special coating on springs for high chemical resistance

Large 52mm opening to make filling easy

Strong plastic tank with 1.5 litre capacity

Large base to give stability when filling

1.5 litre capacity hand sprayer designed to handle products with a pH range of 1 - 9.

The internal non-return valve has a special protection cap to ensure it does not come into contact with the tank contents thus improving chemical resistance.
